	Approved For Release 2003/08/12 : CIA-RDP82-00457R014500070008-0 25X1
	- 2
7.	Basic training was conducted during the period from 1 November to 15 December 1951. The artillery regiment was organized into a regimental headquarters batter and two training batteries. Each battery was brought up to a strength of approximately 220 men with recruits and had three platoons. The two training batteries were disbanded in mid-December 1951 and were reorganized into the first, second
	and third battalion. The best soldiers were assigned to the third battalion. In January 1952, a Soviet major, about 45 years old, inspected the regiment. In mid-February 1952, a two-day practice firing with live ammunition was held in the area of Dueroegd (Y 4/D 36).*
8.	Most of the about 400 recruits were young farm workers of the 1929 through 1931 classes from the Vas County. Very few of them were true Communists. Because
25X1	they had known each other from childhood, there was no mutual distruct and there
25X1	spoke out frankly against the regime. most of the cadre personnel were staunch Communists. *
9.	In December 1951, a decree issued by the Ministry of National Defense was read to the troops. This decree stated that, effective 1 January 1952, the previous address "comrade" for privates was abolished and was replaced by the address "harcos" or fighter. Soldiers holding ranks were to be addressed as "comrades" in addition to their rank.
10.	Engineer Battalion and Signal Unit. The personnel of the engineer battalion were dark green service color. Ten or 15 three-ton trucks usually stood in front of the battalion building. **
11.	The signal unit was estimated to have a strength of about 200 soldiers.
25X1	tre unit was a signal unit. **
25X1	
25X 25X1	Comment. The information on the barracks installation is correct. The Arty
23/1	Regt 5947 was probably activated in the fall of 1951. The heterogeneous equipment indicates either a cadre unit or training unit. The organization of the first battalion, which has batteries equipped with six guns, is noteworthy. The information that the 1929 through 1931 classes are serving is considered correct.
25X ⁴* [Comment. The information on the engineer service color is correct. The
25X1	Festetich castle in Keszthely was previously reported as quartering the Infantry Regt
